

Polymeric Microspheres

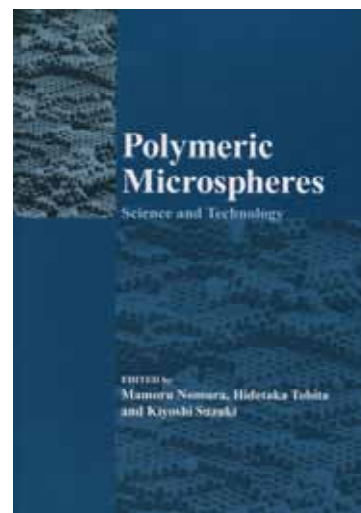

Science and Technology

Memorial Proceedings of the "2nd International Symposium on Polymeric Microspheres" held in March 29-31, 2005 in Fukui.

edited by *M. Nomura, H. Tobita & K. Suzuki, University of Fukui,*
published by *Kyoto University Press* (URL: www.kyoto-up.or.jp)

Hardcover (ISBN 978-4-87698-701-6) 204 pages 定価 US\$45

nomura-m@todorokisangyo.co.jp 宛に直接ご注文下されば特別価格
¥2,700 円(送料込み)にてご購入頂けます。

Contents:

1. Continuous RAFT Miniemulsion Polymerization in Tubular Reactors	1
James P. Russum, Christopher W. Jones and F. Joseph Schork	
2. Review of Progress Towards a Commercially Viable SFRP (Stable Free Radical Polymerization) Miniemulsion Process	15
Michael F. Cunningham, David C.T. Ng, Sarah G. Milton and Barkev Keoshkerian	
3. Emulsion Polymerization with Amphiphilic Block Copolymer as Polymeric Emulsifier Prepared by Two-Step ATRP in Aqueous Heterogeneous Media	31
Masayoshi Okubo, Yasuyuki Kagawa, Yuka Sano, and Toyoko Suzuki	
4. Special Latex Morphologies: From Hollow to Flat Latex Particles	47
Jan Hein van Steenis and Alex M. van Herk	
5. Coloring Latexes	57
Haruma Kawaguchi	
6. Preparation and Applications of Uniform-Sized Poly(lactide) Microcapsules by Membrane Emulsification Technique and Double Emulsion Method	67
Guang-hui Ma, Zhi-guo Su and Rong Liu	
7. Monodisperse Polymeric Microspheres Synthesis by Microfluidic Devices	95
Takasi Nisisako	
8. Molecular-Scale Investigation of Soap-Free Polymerization of Polystyrene Latex Particles by Atomic Force Microscopy	105
Tetsuya Yamamoto and Ko Higashitani	
9. Self-Organization of Polymer Particles on Hydrophobic Solid Substrates in Aqueous System	121
Katsutoshi Nagai	
10. Exploitation of 2-Hydroxyethylsulfone: Vinylsulfone Equilibrium Dynamics for Crosslinking during Film Formation from Latexes	131
David J. Berrisford, Peter A. Lovell, Nadia Suliman and Andrew Whiting	
11. Pavement Preservation Using the SBR Latex Modified Asphalt Emulsion	139
Koichi Takamura	
12. Emulsion Allyl Methacrylate/Alkyl Methacrylate Copolymerizations Based on Mechanistic Discussion of Free-Radical Crosslinking Multivinyl Polymerizations	147
Akira Matsumoto, Hisashi Hayashi, and Hiroyuki Aota	
13. Power-Law Distribution of Molecular Weights in Nonlinear Emulsion Polymers	163
Hidetaka Tobita	
14. A Controlled "Quasi-Adiabatic" Semi-Continuous Emulsion Polymerization Process for High Productivity	181
Do Ik Lee	
15. "Pseudo Cage Effect": A New Concept for Initiator Efficiency in Emulsion Polymerization Initiated by Oil-Soluble Initiators	189
Mamoru Nomura and Kiyoshi Suzuki	
Subject Index	201
